Projects

goodGame | *Full Stack Engineer*

[Live](#) | [GitHub](#)

Platform for tracking board games that allows a user to create shelves and store board game entries

- Incorporates Board Game Geek's database API allowing users to search an extensive database of board games
- Lazily adds API entries to the local database when a user adds an entry to a shelf
- Features full user authentication which integrates the BCrypt gem for password security
- Designed and constructed layout using basic CSS

X-Wing Star Fighter | *Frontend Engineer*

[Live](#) | [GitHub](#)

X-Wing Star Fighter is a game built using HTML5 canvas and Javascript

- Creates a 3d feel on the 2d canvas using variables to hold the distance between objects
- Uses the distance tracking variables to track the size of the hit box for enemy Tie Fighters
- Features an asymptotic function to create realistic laser behavior when the X-Wing fires

Skills

Ruby

Javascript

jQuery

HTML

Git

Ruby on Rails

React.js

SQL

CSS

Git
RSpec
